

# Model 5522AL

emco dirt collection wells are required to counter the increased dirt levels in heavily frequented entrance areas. When combined with the matching emco entrance mat, they form a closed system which reduces dirt transference and protects adjacent indoor floor coverings.

**Description**

Dirt collection wells developed for emco DIPLOMAT and emco MARSCHALL entrance mats for increased dirt uptake.

Outside (Zone 1)

Indoor and outdoor (covered, Zone 1+2)

Street dust, hair, sand, ash, textile fibres, small leaves and twigs, loose chippings, coarse sand, small gravel particles

Damp street dust, damp sand deposits, dust, etc.

# Model 5522AL

<b>Weight (kg/m<sup>2</sup>)</b>	8.8
<b>Suitable for</b>	DIPLOMAT 22 MARSCHALL 22 Also available in large variants.
<b>Approx. material thickness (mm)</b>	3,0
<b>Structure</b>	An dirt-collection well unit can consist of either a single-piece well, or multiple wells with different widths and depths that are assembled consecutively in a modular fashion. From a visual and functional perspective, the entrance mat is manufactured in the same size with an edging frame.

<b>Material</b>	Aluminium, bonded and waterproof, interior completely smooth for easy cleaning. Also available in stainless steel (V2A) on request.
<b>Additional data</b>	The support for the entrance mat is integrated in the well.
<b>Larger dimensions</b>	Multiple well units are placed next to each other on site to make a single system.
<b>Drainage system</b>	This type of well does not have a drainage system
<b>Well overall height</b>	25mm
<b>Max. well width, one piece (mm)</b>	2800
<b>Max. well depth, one piece (mm)</b>	1300
