### Description

The emco Image ECO is made of the high-quality, sustainable ECONYL® brand yarn and is characterised by a high absorption of dirt and moisture. Through the excellent printability, the emco Image ECO has an outstanding advertising effect. The ECONYL® regeneration process transforms, what was once waste, into a new source of opportunities, which in this case is the production of emco Image ECO carpet mats. Nylon waste, such as fishing nets, that are no longer usable and would go into disposal, are now collected and transformed into new yarn. The waste is transformed into a 100% regenerated yarn, which has the same properties as nylon, made from new raw materials.
