

For outside!

emco **IMAGE OUTDOOR**

**The individual logo mat
for outside use**

Designing clean entrances

EMCO

Effective. Impresses visitors.

After all, that's what you do at home, too: you receive your visitors in person – you may even step out to greet them. This welcoming gesture is now also possible outside your own four walls. And here the word “outside” is to be taken completely literally. Weather-proof and individually printed, the new emcoIMAGE OUTDOOR logo mat is a visible sign outside your door and provides a personal welcome to visitors. Its excellent brush effect ensures a polished appearance inside the building, too.

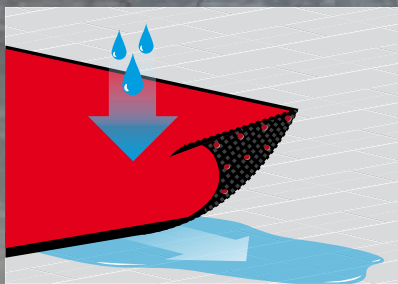

●●● MADE IN GERMANY

Personal.

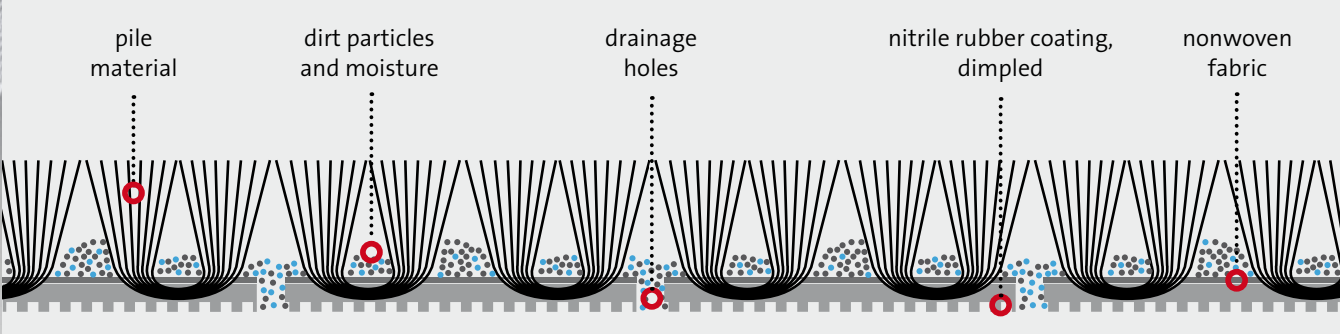

Reliable.

EMCO

The fine holes in the backing material prevent water collecting in the mat, so that it remains effective even in the rain.

Clean.

Effective in any weather.

A carpet mat for outside? Certainly, because the materials and workmanship are specifically tailored for use in outdoor areas. The fibres are made of 100% water-repellent polyamide, and any moisture in the mat is drained away through the fine holes in the backing material. Even intense sunlight has no effect on the UV-resistant, dyed fibre system.

The water-repellent and weather-proof mat simply wipes dust and dirt off the shoes as people walk across it – before it can reach the inside. And what happens if the mat gets really dirty? It can simply be washed.

The emco **IMAGE OUTDOOR**
is designed for outdoor use.

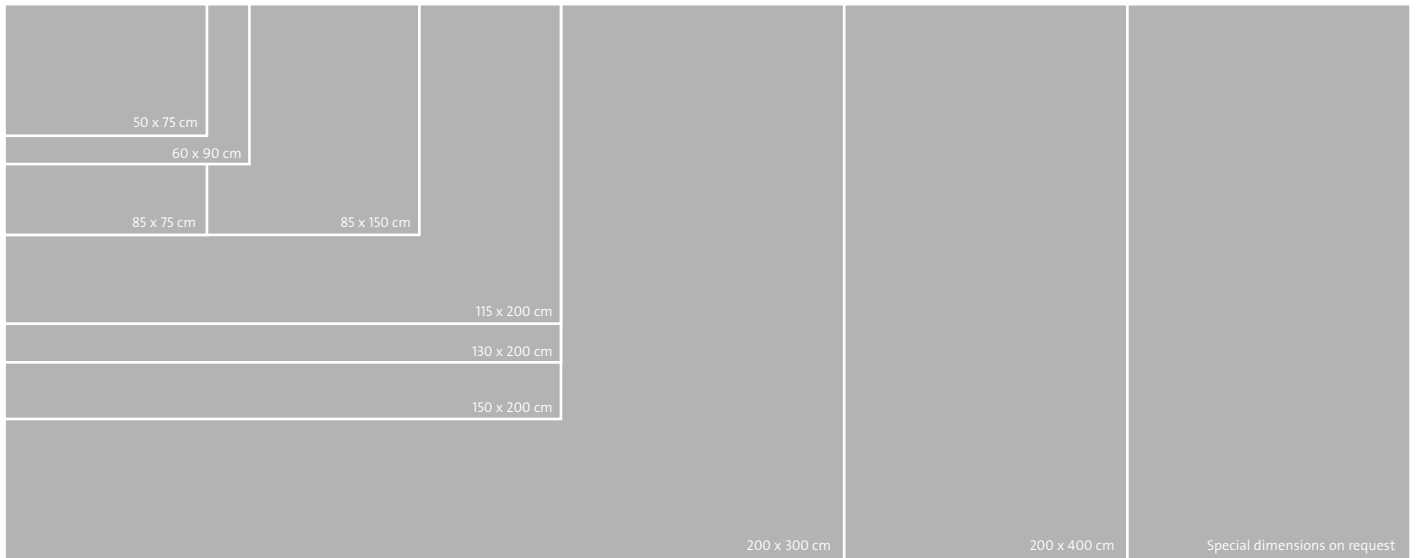

Water repellent.

Water draining.

Lightfast.
